

Year 9 History			
1 Knowledge, explanation and evaluation	<ul style="list-style-type: none"> Provides multiple (more than two) relevant examples of knowledge; some will be specific There is some developed explanation of knowledge (i.e. a mostly effective PEGEX paragraph) Examines more than one factor Reaches a judgement with a more developed explanation Shows some recognition of linkage Uses relevant details from a source Applies some specific of developed knowledge to a source Identifies features of provenance (who, when, what, why) and begins to make simple comments about utility Begins to reach an explained judgement on the utility of a source using either content or provenance 	<ul style="list-style-type: none"> Provides multiple (more than two) specific and relevant examples of knowledge There is well developed explanation of knowledge (i.e. a very effective PEGEX paragraph) A variety of factors are examined Reaches an explained judgment with comparative assessment (e.g. comparative importance of factors) Simple explanation of how factors can link together Uses relevant details from a source Is able to make simple inferences from a source Applies specific or developed knowledge to a source Identifies all relevant features of provenance (when, who, what and why) and provides some explanation of significance for utility Reaches an explained judgement on the utility of a source having considered either content or provenance 	<ul style="list-style-type: none"> Consistently provides multiple (more than two) specific and relevant examples of knowledge There is well developed explanation of knowledge throughout (i.e. a very effective PEGEX paragraph) A variety of factors are examined Reaches an explained judgment with well developed comparative assessment (e.g. comparative importance of factors) Explains how factors can link together Uses relevant details from a source Is able to make explained inferences from a source Applies specific or developed knowledge to a source Identifies all relevant features of provenance (when, who, what and why) and provides thorough explanation of significance for utility Reaches an explained judgement on the utility of a source having considered both content and provenance
2 Knowledge, explanation and evaluation	<ul style="list-style-type: none"> Provides multiple (more than two) relevant examples of knowledge; some will be specific There is some developed explanation of knowledge (i.e. a mostly effective PEGEX paragraph) Examines more than one factor Reaches a judgement with a more developed explanation Shows some recognition of linkage Uses relevant details from a source Applies some specific of developed knowledge to a source Identifies features of provenance (who, when, what, why) and begins to make simple comments about utility Begins to reach an explained judgement on the utility of a source using either content or provenance 	<ul style="list-style-type: none"> Provides multiple (more than two) specific and relevant examples of knowledge There is well developed explanation of knowledge (i.e. a very effective PEGEX paragraph) A variety of factors are examined Reaches an explained judgment with comparative assessment (e.g. comparative importance of factors) Simple explanation of how factors can link together Uses relevant details from a source Is able to make simple inferences from a source Applies specific or developed knowledge to a source Identifies all relevant features of provenance (when, who, what and why) and provides some explanation of significance for utility Reaches an explained judgement on the utility of a source having considered either content or provenance 	<ul style="list-style-type: none"> Consistently provides multiple (more than two) specific and relevant examples of knowledge There is well developed explanation of knowledge throughout (i.e. a very effective PEGEX paragraph) A variety of factors are examined Reaches an explained judgment with well developed comparative assessment (e.g. comparative importance of factors) Explains how factors can link together Uses relevant details from a source Is able to make explained inferences from a source Applies specific or developed knowledge to a source Identifies all relevant features of provenance (when, who, what and why) and provides thorough explanation of significance for utility Reaches an explained judgement on the utility of a source having considered both content and provenance
3 Knowledge, explanation and evaluation	<ul style="list-style-type: none"> Provides multiple (more than two) relevant examples of knowledge; some will be specific There is some developed explanation of knowledge (i.e. a mostly effective PEGEX paragraph) Examines more than one factor Reaches a judgement with a more developed explanation Shows some recognition of linkage Uses relevant details from a source Applies some specific of developed knowledge to a source Identifies features of provenance (who, when, what, why) and begins to make simple comments about utility Begins to reach an explained judgement on the utility of a source using either content or provenance 	<ul style="list-style-type: none"> Provides multiple (more than two) specific and relevant examples of knowledge There is well developed explanation of knowledge (i.e. a very effective PEGEX paragraph) A variety of factors are examined Reaches an explained judgment with comparative assessment (e.g. comparative importance of factors) Simple explanation of how factors can link together Uses relevant details from a source Is able to make simple inferences from a source Applies specific or developed knowledge to a source Identifies all relevant features of provenance (when, who, what and why) and provides some explanation of significance for utility Reaches an explained judgement on the utility of a source having considered either content or provenance 	<ul style="list-style-type: none"> Consistently provides multiple (more than two) specific and relevant examples of knowledge There is well developed explanation of knowledge throughout (i.e. a very effective PEGEX paragraph) A variety of factors are examined Reaches an explained judgment with well developed comparative assessment (e.g. comparative importance of factors) Explains how factors can link together Uses relevant details from a source Is able to make explained inferences from a source Applies specific or developed knowledge to a source Identifies all relevant features of provenance (when, who, what and why) and provides thorough explanation of significance for utility Reaches an explained judgement on the utility of a source having considered both content and provenance
